It's the "Blue Book" the gun BibleBy RandyI bought this book along with the "Catalog of Firearms" to get a general idea on gun values, for purchase at auctions, etc, but these figures are just ballpark. Value and cost are determined by your location and what someone else is willing to pay. Just be warned

that you sure don't need a new book every year. Once every 3-4 years is plenty, and none of these books covers every scenario. 1 of 1 people found the following review helpful. 34th Edition Blue Book Of Gun Values By Retiredcoastie This is an incredible reference book! I have purchased other so called gun value books in the past but, none come close to being as well researched as The Blue Book. There are literally thousands of weapons listed, old collectibles right up to new on the market weapons. I can peruse through the book and daydream about owning some of the more exotic offerings from some gun manufacturers. I can also check different models of weapons I plan on purchasing to see their list of features and pricing before I buy. I cannot recommend this wonderful reference book enough for the beginner shooting enthusiast/ collector and for the experienced collector. Do not let the cost of this book keep you from owning a great go to reference tool. Other books claim to be the best gun value reference book but, only The Blue Book truly delivers a great gun value and knowledge book. You will not be disappointed nor will you feel that you wasted your hard earned money. 10 of 10 people found the following review helpful. Great book By Gary W Always the bible of guns the reference that most gun dealer use. Covers everything ever made. Can be difficult to find a particular model because there is so much reference.

The new 34th Edition of the Blue Book of Gun Values by S.P. Fjestad has been expanded to 2,432 pages, easily making it the highest page count of any firearms book currently in print. New 2013 makes and models have been included, along with updated values on discontinued firearms and antiques. Once again, the 80-page Photo Percentage Grading System provides high resolution color images that are the last word to help ascertain any firearm's correct condition factor based on the percentage of original condition. Revolvers, pistols, rifles, and shotguns are also shown separately, in addition to NRA Antique Condition Factors. Other sections have also been expanded, including Serialization and the helpful Trademark Index, which lists all pertinent information on many of the world's firearms manufacturers, distributors, and importers. Most of the information contained in this publication is simply not available anywhere else, for any price!

The Blue Book of Gun Values is without a doubt THE standard reference for the industry - in business time, access to accurate information and values are two vital things. Keep up the good work! --Philip O'Dell, President, Canadian Historical Arms Museum About the Author Author/Publisher S.P. Fjestad is a world recognized authority of firearms and their values.
