Shirley Friedland : African Fabric Design (Schiffer Book for Collectors with Price Guide) before purchasing it in order to gauge whether or not it would be worth my time, and all praised African Fabric Design (Schiffer Book for Collectors with Price Guide):

The fabrics here are African designs, made primarily in Africa, commercially, rather than by traditional methods. Most are contemporary, made of cotton; though varieties of rayon, wool, a blend, or synthetic also are present, as well as fabric with metallic thread or surface embellishment. Many examples are printed adaptations of traditional woven textiles, because the pattern and color and their effect are the essential qualities. This volume, arranged visually with a focus on design, color, and pattern, is a pictorial survey, which includes examples of simple, bold two and three-color designs, stripes, grid formats, and overall geometric patterns. The pictures serve as reference and inspiration to artists, designers, and all involved with fashion and fabric. The companion volume, African Prints, complements the designs featured in this book.
