When it was first published it was a trove of information at a time when the resources were still few and far between. Over the years there have been many more museum shows and much scholarly study of the American Arts and Crafts Period, but this book still harkens back to a time when the pieces were still relatively rare and the opportunity to see the finest examples was even more rare. Leslie Bowman performed yeoman service curating this catalog and for that and for all of her work I am eternally grateful.0 of 0 people found the following review helpful. Influenced by developments in Europe, American proponents in the late 19th and early 20th centuries successfully promoted the "minor arts" as fine art hand-wrought by individual craftsmen, extolling the virtue of everyday objects and a return to honest, simple materials and workmanship. The designs are, perhaps, the closest embodiment there is of "American style". Included are furniture, ceramics, metalwork, glass, books, drawings and textiles by Gustav Stickley, Greene Greene, Frank Lloyd Wright, Tiffany Studios and many others. This book looks at their work.
